

Arizona Report of Public Agency Performance on Racial / Ethnic Disproportionate Representation

Indicator 9: Racial / Ethnic Disproportionality

Percent of PEAs with disproportionate representation of racial and ethnic groups in special education and related services that is the result of inappropriate identification.

Measurement

Arizona uses Statistical Analysis Software (SAS) to consider ethnicity information to identify those public education agencies (PEAs) in Arizona that have unusually high or unusually low rates of students (aged 6–21) in special education. The software compares the ethnic makeup of the State to the ethnic data of each agency and provides a weighted risk ratio (WRR) for each agency.

Arizona uses a WRR of ≤ 0.30 for under identification and a WRR of ≥ 3.0 for over identification in determining if a PEA has disproportionate representation. Because Indicator 9 is concerned with disproportionate representation that is the result of inappropriate identification, the ADE reviews the policies, procedures, and practices of the identified PEAs to determine compliance with child find, evaluation, and eligibility requirements.

Data

The data are from school year 2010–2011. The table below indicates whether each PEA had a WRR of ≤ 0.30 or ≥ 3.0 for any ethnic group. If the answer to that question is “yes”, then the table indicates if the State determined that the PEA had inappropriate policies, practices, or procedures in identification.

State Target: 0% PEAs with disproportionate representation that is the result of inappropriate identification.

State Results: 0% PEAs with disproportionate representation that was the result of inappropriate identification.

PEA	Was disproportionate representation evident (WRR ≤ 0.30 or ≥ 3.0)?	Was disproportionate representation the result of inappropriate identification?
A Center for Creative Education	No	NA
